PROFESSIONAL EXPERIENCE

Software Engineer Intern - Basketball Operations

Jan 2026 – Present

Oklahoma City Thunder

Oklahoma City, Oklahoma (Remote)

- Owned full-stack overhaul of a core internal analytics feature: rebuilding a static, fixed-column reporting view into a configurable, metadata-driven tool with dynamic filtering, period comparisons, and rank-aware columns, spanning the data computation layer, Django backend, and Angular frontend
- Profiled and diagnosed a multi-minute API response regression caused by expanded computation scope; implemented a short-path and additional cache layer that reduced response time from minutes to seconds
- Drove migration of data-processing pipeline from Pandas to Polars, preserving metric correctness throughout performance-oriented refactoring
- Traced and resolved cross-layer bugs spanning Angular state management, API request flow, and Django response handling, improving reliability of production analytics tools

Tech: Python, TypeScript, Angular, Django, PostgreSQL, NgRx, Polars

Technology Investment Banking Analyst

2021 – 2023

Citigroup

San Francisco, California

- Advised technology companies in M&A, equity raises, leveraged finance deals totaling \$2B+ in transaction value
- Built complex financial models and performed quantitative analysis using Excel and financial software
- Conducted comprehensive industry research and synthesized large datasets to support strategic decision-making
- Collaborated with cross-functional teams to deliver time-sensitive deliverables under pressure

PERSONAL PROJECTS

Front Office Wire ([GitHub](#))

Python, SQLite, GitHub Actions

- Built a job monitoring tool that scrapes 50+ professional sports organization job boards across the NBA, NFL, MLB, NHL, and MLS, filtering for software and data engineering roles
- Implemented scrapers for multiple applicant tracking platforms — including Greenhouse, Lever, and Workday via their public REST APIs — with HTML scraping fallback for remaining sources
- Automated via GitHub Actions on a 6-hour schedule; uses SQLite-backed deduplication and a consolidated email digest to surface each new matching role exactly once

EDUCATION

University of Colorado Boulder - College of Engineering & Applied Science

2024 - 2026

B.S. in Applied Computer Science (Post-Baccalaureate) - *Summa Cum Laude* | GPA: 3.9/4.0

University of Colorado Boulder - Leeds School of Business

2017 - 2020

B.S. in Business Administration – Finance, *With Honors, With Distinction* | GPA: 3.9 / 4.0

Leeds Honors Program, Dean's List (all semesters), Beta Gamma Sigma

TECHNICAL SKILLS & INTERESTS

Languages: Python, TypeScript, JavaScript, SQL, Go, HTML/CSS

Frameworks: Angular, Django

Tools: PostgreSQL, SQLite, Pandas, Polars, Git, Linux, Bash

Personal Interests: Basketball, Strength Training, Fishing, Guitar, Travel
